I urge you to reject National Association of Broadcasters petition 04-160. I pay for satellite radio because of the unique on-demand service it provides. I want to continue receiving instant local weather and traffic reports. I need them when I travel (and I drive long distances between major east coast/midAtlantic cities often) and this is the most efficient way I have found to get that information. This service helps me take the safest and quickest route to where I need to be. I do not understand how you can even consider limiting what I have the right to hear -- especially when I am paying for this service!
